OEM SOLUTIONS

We manufacture your custom designed and OEM cables upon request.

Our technical engineers and our logistics team understand the OEM industry's requirements to continuously improve efficiency while also reducing complexity and risk. As a trusted OEM cable supplier,
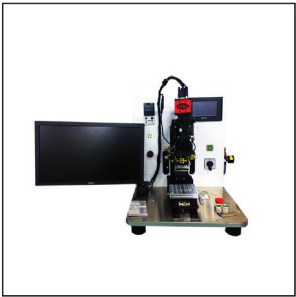

PRODUCTION LINE EQUIPMENTS

We offer an extensive selection of industrial semi-automation and process control cables that facilitate data and signal transmission without interference. Our range of cables caters to various industries, reflecting the diversity of applications for which our cables are used.

LASSER WELDING MACHINE

The automatic HDMI/DP/FCC connector Soldering machine uses pulse heating technology to work, so the temperature control is very accurate. No more hand welding   always a perfect soldering no

CABLE WINDING MACHINE

Semi automatic Winding and bunding machine
you can winding and tieing in one time
Four time more faster then old hand method , speed the time and save labor cost.

OPTICAL FIBER LASER MARKINGMACHINE

Laser Engraving Glass, Metal, Plastic surface
use for engraving logos , QR codes, customer OEM designs on the product suface

AUTOMATIC CABLE WIRE CUTTING

the wire will be cut and stripped automatically. you always get the same cable size in every order

CONTINUOUS SEALING MACHINE

The product uses an electronic constant temperature mechanism and stepless speed adjusting transmission mechanism and it can seal plastic film or bags of various materials in various shapes. special for OPP bags sealing

LASSER WELDING MACHINE

The automatic USB connector soldering machine adopts a vibration plate to feed loose USB connectors automatically. The worker only needs to simply place the cable into certain working area.
No more hand welding

INJECTION MOLDING MACHINE

applicable rubber compound: ABS/PVC/ PA/PP/PC/POM/PBT fluorocarbon and other heavy engineering plastic injection molding
for : VGA/SVGA/DVI/HDMI/DP/USB and more

HAND-HELD SCREWDRIVER

The electric or pneumatic screwdriver will lock the screws into the right place of the products. Compared with traditional screwdriver, automatic screwdriver machine just needs one hand to take the screwdriver and align the screw hole, saving the other hand.

TEST LAB INSTRUMENTS

Our team of skilled engineers, with over 15 years of experience in utilizing software for technical drawing, allows us to manufacture products that adhere strictly to the customer's specifications.

To facilitate our research and development, we have equipped ourselves with a range of machinery and equipment, including CAD/CAM, Pro/e, Adobe Illustrator, Corel Draw, REACH, RoHs testing equipment, and temperature equipment.
Our Products have been tested and approved by CE, FCC and Rohs.

INSERTING AND PULLING FORCE

This machine is specially designed to test the bending strength of the lead wire and cable of the plug; the speed is transmitted by the photoelectric sensor to the digital display meter, and the value can be read by directly adjusting the non-polar governor.
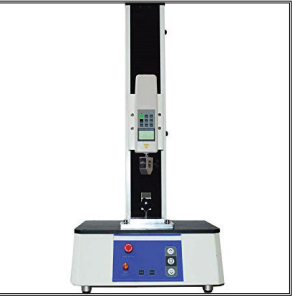

TENSILE TEST MACHINE

The machine is equipped with different fixtures to achieve tensile, force, bending, peeling, shearing, tearing, puncture and other mechanical tests. Machines are widely used in factories, universities, scientific research institutions, technical supervision, quality inspection stations and other departments.

PLUG WIRE BENDING TESTING MACHINE

The machine is suitable for a variety of connector plug experiment, adopted the embedded micro-computer measurement and control technology. Insertion force , pullout force , instant force .It also has the founction of Auto Zero and Unit Conversion,etc

UNIVERSAL CABLE HARNESS CABLE

Cable tester is used for test and measure wire cable harness,wire harness, like as : auto cable,audio cable, power cable, network cable, telephone cable, USD cable, HDMI cable,video cable, etc. .

PLASTIC DROP BALL IMPACT TEST MACHINE

The machine will test the product on the test bench, the weight of steel balls from the specified drop height free fall on the product, the product impact, and then check the appearance of the product and all aspects of performance.

FLUKE ETHERNET CABLE TESTER

The Ethernet Cable Tester is designed specifically for testing residential copper cables where ensuring certification for specific standards isn't necessary.

PREMIUM HDMI CABLE CERTIFICATION PROGRAM
Premium High Speed HDMI® cables are tested to ensure quality for feature-rich 4K/Ultra-HD content

The Premium HDMI® Cable Certification ProgramTM encompasses additional and enhanced cable testing as well as an authentication and verification program for High Speed HDMI Cables.Cables are tested to ensure they support the full 18Gbps bandwidth with an EMI test to ensure cables minimize interference with wireless signals.

The program is designed to give end users confidence when purchasing new HDMI® cables for their 4K/UltraHD products that may include features such as 4K@60Hz, BT.2020 and HDR. Participating HDMI Adopters can promote their HDMI ATC-tested High Speed HDMI Cables as Premium High Speed HDMI Cables or Premium High Speed HDMI Cables with Ethernet using a unique anti-counterfeiting authentication label on their products.

These special cables are available with both HDMI Type-A and Type-D Connectors.

Exclusive Multiple Shielding

HDMI 2.0 18 Gbps
HDMI 1.3 10.2 Gbps
HDMI 1.0 4.95 Gbps

Ultra High Speed HDMI® Cable Certification Program

The HDMI 2.1a Specification includes a new cable - the Ultra High Speed HDMI® Cable. It's the only cable that complies with stringent specifications designed to ensure support for all HDMI 2.1a features including uncompressed 8k@60 and 4K@120. The cable's increased bandwidth capability supports up to 48Gbps.

The Ultra High Speed HDMI Certification Program is a mandatory certification program for all Ultra High Speed HDMI Cables; and ensures quality Ultra High Speed HDMI Cables reach the market and support 4K and 8K video, HDR, VRR, eARC, and all other HDMI 2.1a features. Cables are also required to be tested and certified to ensure low EMI to reduce the possibility of interference with wireless networks, streaming media players, Bluetooth devices and mobile phones.

All certified cables of any length must pass certification testing at an HDMI Forum Authorized Testing Center (Forum ATC). Once certified, cables will be required to affix an Ultra High Speed HDMI Certification Label to each package or unit of sale enabling consumers to verify the certification status of the product.

Displayport male > Displayport male

• Support 8K@60Hz , Supports HBR3, HDCP 1.4 / 2.2; very good compatibility
• Support DP1.4 standard, bandwidth can reach 8.1 Gbps per chanel, 32Gbps total
• Up to 32 audio channels with 1536 Hz sampling rate
• Support DPCP/EDID/CEC/DDC
• Latching connectors prevent accidental disconnection
• Plug and play
• Low RFI / EMI profile for sensitive applications

USB 3.2 GEN 2 Hybrid 10Gbps

USB-C™ male > USB-C™ male

• Meet USB 3.1 Gen2 Standard , bandwidth can reach up to 10Gbps super speed
• Support length up to 30m
• Hybrid optical cable with fiber and copper wire
• Support USB 2.0 & 3.0
• Support two sides plug and play
• Can provide 5V 800mA power maximum to the remote device
• Does not support charging or powering of devices
• No RF interference , working stable in complex environments

•To better understand our products, let me introduce you to our USB Type-C to Universal Laptop Adapter converter. This converter allows you to charge your laptop using a USB Type-C adapter, eliminating the need for a traditional laptop adapter. Please note that our converter is not a power source on its own and requires a USB Type-C adapter to function.

• Whether or not you can charge your laptop using a power bank depends on the output power of your power bank. Make sure that the output power of your power bank is not lower than the power needs of your laptop.

•Unfortunately, you cannot charge your laptop using a USB-C phone adapter as the power output is too low. Phone adapters usually have an output of only 5W-10W, while laptop adapters typically have a much higher output, such as 65W, 90W, or more, such as 19V 3.42A 20V 3.25A 65W; 19V 4.74A 20V 4.5A 90W.

•To check the charging power of your laptop, please follow these steps:

輸入/INPUT：20V ⎓ 4.5A
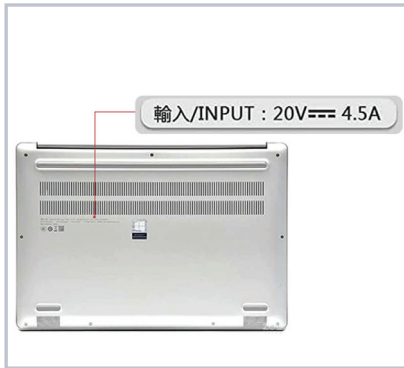

1. Check the bottom information of the laptop (Voltage / Current)

VOLTS	AMPS	WATTS	COMPATIBLE
20V	4.5A	90W	YES ✓

OUTPUT(輸出)：20V ⎓ 4.5A

Check the Bottom info of your laptop
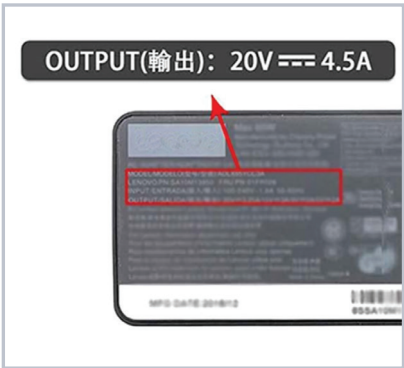

Check the Bottom info of your Laptop Power Adaptor

•To select the appropriate USB Type-C adapter, you must ensure that its output power is equal to or greater than the power requirements of your laptop. For instance, if your laptop requires a charging power of 20V 4.5A 90W, then your USB Type-C adapter must have an output power of at least 90W; otherwise, it will not function.
Therefore, it's crucial to carefully check the specifications before placing an order.
